

Kaspersky® Total Security

Our Best Protection for Your Family
on PC, Mac, Android™, iPhone & iPad

YOUR FAMILY'S CONNECTED – BUT IS IT PROTECTED?

Today, the connected family needs to be the protected family. That's why we help you guard your privacy, kids, money, identity and precious memories against online threats and more.

STOPS ATTACKS & MORE

Because you need to protect your family, our security defends against infections & attacks, blocks banners* & spam, keeps software up-to-date and warns about dangerous websites.

SECURES MULTIPLE DEVICES

Whatever combination of computers and mobiles your family has, we'll help you protect them all – and lock, wipe & locate Android phones & tablets if they're lost or stolen.

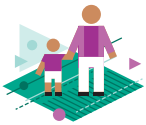

BLOCKS PHISHERS & SPIES

Your family's privacy is important – so we help guard personal data, prevent online activities being monitored** and block unauthorized access to your webcams**... plus protect data transmitted over public networks*.

PROTECTS YOUR MONEY

Whenever your family's online, cybercriminals could be watching. Our unique security helps to protect money and account details – to stop fraudsters stealing them.**

DOES MORE TO GUARD KIDS

With device usage scheduling, GPS safe zones, notifications about suspicious activities and summaries of what your kids search, see & share... Kaspersky Safe Kids helps you stay connected with your children.

SECURELY STORES PASSWORDS

There's no need to memorize all your complex passwords. Each family member*** only needs to remember their one master password – to access all their individual passwords, via their computers & mobiles.

PROTECTS PRECIOUS MEMORIES

Because you never want to lose irreplaceable files, we help you back up your family's precious memories – plus encrypt files, so they can't be read if lost or stolen.*

LETS DEVICES PERFORM

Security shouldn't slow your family down. Our protection works 'behind the scenes' – so everyone can get on with their busy lives.

SIMPLIFIES FAMILY SECURITY

Nobody wants to waste time getting to grips with complex security. That's why we give you a free My Kaspersky account that makes it easy to manage your family's security.

Key features

Manage your software

Software Updater* scans the software on your PC and installs updates – to keep your software up-to-date. Software Cleaner* finds applications, toolbars, adware and other software that may affect performance – and lets you decide whether to remove them. Installation Assistant* helps block installation windows that try to install software or make changes to your PC.

Secure your communications

If you're using a public network, Secure Connection* encrypts all data you send and receive. Even if data is intercepted, it can't be read. When you're using Wi-Fi, the Wi-Fi Security Notification* feature checks the connection you're using – to look for vulnerabilities, warn about risks and advise about adjusting security settings.

Block dangerous behavior

System Watcher* looks for malicious behavior and helps you rollback the effects of infections – plus Anti-Blocker* helps prevent ransomware locking up your data.

Defend your privacy

Private Browsing** prevents tracking of your web browsing habits and blocks the capture of your personal information. Anti-phishing protection – for PC, Mac & Android – helps prevent phishing websites capturing personal data and stealing identities and money. Webcam Protection** prevents unauthorized, remote access to your webcam – so no one can use it to spy on you. Anti-Banner* blocks website adverts and banners – so you can get on with what you really want to do.

Protect your passwords

Your family can manage an unlimited number of passwords – plus unlimited numbers of identity cards.

Range of functions depends on the type of device being used.

*Available on PCs only.

**Available on PCs & Mac computers only.

***Number of users depends on the license purchased.

What if your customer has never heard of Kaspersky Lab?

Kaspersky Lab is the world's most-tested, most awarded security. For nearly 20 years, Kaspersky Lab has been a recognized expert in the fight against malware and cybercrime. In 2015 alone, our products participated in 94 independent tests and reviews and were awarded 60 first places and 77 top-three finishes. Each year, our share of first places increases, demonstrating our focus on constantly enhancing and improving our products. This is just a couple of reasons why 400 million users in 200 countries & territories choose Kaspersky Lab to protect their businesses from cyber threats.

What if your customer says they're happy with a product they got for free?

Most free software is designed to get users to buy more functionality – and usually runs annoying ads that can only be switched off when they pay. And as you might expect from something you got for nothing, free security software usually offers only the most basic tools: no high quality defense against rapidly growing threats such as ransomware, no privacy protection or dedicated security for financial transactions, no personal data protection ... And no support when something goes wrong. Having bought the annual license your consumer should expect:

- Powerful security technologies with real-time, cloud-assisted defenses
- FREE, automatic updates to safeguard you against today's Internet threats
- FREE upgrades to the newest version with extended functionality & optimized performance
- FREE and easy to access technical support

What if your customer doesn't think they need protection for all their devices?

Perhaps that used to be the case, but cybercriminals evolve. Thankfully, so do Internet security products. In a world of increasingly sophisticated Internet threats which are everywhere, people want to feel confidence they are safe when communicate, have fun, and do their jobs – no matter whether it is PC, Mac or mobile device.

SYSTEM REQUIREMENTS

FOR ALL DEVICES

- Internet connection required
- Webcam Protection technology only runs on PCs & Mac computers. The feature is available for a range of compatible web-cameras. For the full list of compatible devices, visit www.support.kaspersky.com
- Minimum screen resolution: 1024x600 (for Windows-based tablets), 320x480 (for Android™ devices)

WINDOWS-BASED DESKTOPS AND LAPTOPS:

- 1020 MB free space on the hard drive
 - Internet Explorer® 9 or higher
 - NET Framework 4 or higher
 - Windows 10¹ / 8 & 8.1 / Pro / Enterprise² / 8.1 update / 7 SP1 or higher³
 - Windows Vista® Home Basic / Home Premium / Business² / Enterprise² / Ultimate SP1⁴ or higher³
 - Windows XP Home² / Professional (32-bit) SP3 or higher / Professional (64-bit³) SP2 or higher⁵
- Processor: 1 GHz or higher
Memory (RAM): 1 GB (32-bit) or 2 GB (64-bit)

WINDOWS-BASED TABLETS (system with an Intel® processor)²

- Windows 10^{1,3} / 8 & 8.1 / Pro (64-bit³)

MAC DESKTOPS AND LAPTOPS:

- 960 MB free space on the hard drive
- Memory (RAM): 1.5 GB
- OS X 10.9 – 10.11

SMARTPHONES AND TABLETS:

- Android 4.0–6.0
- iOS® 8.0 or higher⁶
- Windows Phone® 8⁷

Full details on System Requirements are available at www.kaspersky.com.

- 1 If you're using Windows 10, currently the product functionality might be limited and partially unavailable. To ensure continued compatibility with Windows 10, please download & install all available patches for your Kaspersky Lab security software. Product is not intended to operate on Windows 10 Mobile/Education/IoT Core editions.
- 2 The Kaspersky Safe Kids service isn't available for this version of OS or type of device.
- 3 Some product features may not work on 64-bit operating systems.
- 4 To use the Kaspersky Safe Kids service on Windows Vista Home Basic / Home Premium / Ultimate, please use Windows Vista SP2 or higher.
- 5 If you're using Windows XP on FAT32 file system, product installation is not supported.
